Before you start

Use this guide to complete your 2018 AgriStability Interim payment form.

Review this guide to make sure you fill out your form correctly. Providing correct information helps us to accurately calculate your benefits and prevent processing delays.

Once we receive your completed form, we will send you an Interim Calculation of Program Benefits (COB) Notice showing how we calculated your benefit.

AgriStability overview

AgriStability is a voluntary Business Risk Management program that provides support when you experience larger income losses.

AgriStability is cost shared by the federal and provincial/ territorial governments on a 60/40 basis.

AgriStability is based on margins:

Program margin - your allowable income minus your allowable expenses in the current year adjusted for changes in purchased inputs, receivables, payables and inventory.

Reference margin - an average of your historical program margins with adjustments made to reflect significant changes to the size or structure of your farm.

Reference margin limit – your average allowable expenses for the three years used to calculate your reference margin.

Generally, you will receive an AgriStability payment when your program year margin in the current year falls below 70% of either your reference margin or your reference margin limit, whichever is lower. However, your reference margin limit cannot reduce your reference margin by more than 30%.

For example: If your reference margin is $100,000, your reference margin limit cannot reduce your reference margin below $70,000 ($100,000 - $30,000).

2018 Reference margins will be calculated as follows:

If you participated in the program in any of the past four years, we will calculate your reference margin using the program margins for the previous five years. The highest and lowest program margins are dropped and the remaining three are averaged. This is called an Olympic average.

If you did not participate in the program for the past four years, we will calculate your reference margin using an average of the three previous program margins. We will continue to calculate your reference margin using three previous program margins until you have five years of historical information on file.

If you did not have farming activity in one or more of the five previous years, your reference margin will be calculated using an average of the three previous years. If you did not have farming activity in any of the three previous years, we will create margins for any missing years using industry averages.

Participation overview

Participants include:

- individual producers
- landlords in a crop or livestock share joint venture*
- partners in a partnership
- corporations
- co-operatives
- communal organizations
- estates
- trusts
- limited partnerships
- Status Indians and Band farms farming on a reserve

*If you farm as a landlord you are eligible only if you are in a joint venture with the tenant and your share of the allowable expenses is reasonable for your share of the allowable income.

To participate in AgriStability, each year you must:

- pay an enrolment fee
- submit a form
- file an income tax return reporting farming income (loss) by the final deadline for the program year

Generally, you are eligible for AgriStability if you earn income from the primary production of agricultural commodities and you:

- farm in Canada

- file an income tax return reporting farming income (loss), unless you are exempt from filing income tax
- complete six months of farming activity
- complete a production cycle (for example, growing and harvesting a crop, rearing livestock)
- submit all necessary information by the required deadlines

Note: We may wave the requirements to complete six consecutive months of farming activity and a production cycle if you experienced a disaster.

If you are Status Indian farming on a reserve and you are not required to file an income tax return, send us your farming income (loss) information you would have otherwise reported for income tax. We will assume you have a December 31st fiscal year-end.

For complete program rules, see the AgriStability Program Guidelines at agr.gc.ca/agristability.

Interim payment overview

The 2018 Interim payment is an advance on your final 2018 benefit, based on an estimate of your program year and reference margins.

If you receive a 2018 Interim payment, you must submit the following forms by December 31, 2019:

- a 2018 income tax return reporting farming income (loss) and
- a 2018 final AgriStability form

Otherwise, you will have to repay your Interim payment.

Because Interim Payments are based on estimated margins, it is important that you provide the most accurate information possible. If your information is not estimated accurately, your Interim payment may exceed your final payment and you will have to repay the amount that was overpaid.

To help prevent overpayments, Interim payments are generally based on 50% of the estimated final benefit. We do not issue payments for less than $250.

Once we process your form, we will send you an Interim Calculation of Program Benefits (COB) Notice showing you how we calculated your benefit.

You may adjust the information on your Interim form by the later of:

- 30 days from the date of your Interim Calculation of Program Benefits Notice (COB) or
- March 31, 2019

Since your Interim payment is only an estimate of your 2018 final benefit calculation, you cannot appeal this interim calculation. You can only appeal your final benefit calculation.

Steps to participate

Step 1: Enrol in AgriStability and pay your fee

- If you participated in AgriStability for the 2016 or 2017 program year, we will automatically issue you an Enrolment Notice and enrol you in the program.
- If you did not participate in AgriStability for both the 2016 and 2017 program years, you must either request to participate or submit your Interim Payment form to us before the April 30, 2018 enrolment deadline to enrol in the program.
- Pay your fee by the deadline shown on your Enrolment Notice.

Step 2: Complete the 2018 AgriStability Interim Payment form

- Return your completed form to us by March 31, 2019.

Step 3: File your final 2018 AgriStability form by the deadline

- The initial deadline to file your form without penalty is September 30, 2019.
- The final deadline to file your 2018 AgriStability form with a late filing penalty is December 31, 2019.

Step 4: File an income tax return by the 2018 program deadline

- File a 2018 income tax return reporting farming income (loss) to the Canada Revenue Agency by December 31, 2019.

Important deadlines

April 30, 2018

- deadline to enrol for 2018 AgriStability

March 31, 2019

- deadline to file your 2018 AgriStability Interim payment form

September 30, 2019

- initial deadline to file your 2018 AgriStability form without a late filing penalty

December 31, 2019

- deadline to file your 2018 income tax return reporting farming income (loss) to the Canada Revenue Agency
- final deadline to file your 2018 AgriStability form with a late filing penalty

We will reduce your benefit by $500 for each month (or part of a month) you submit your form between the initial and final deadline dates.

If your late filing penalty is more than your payment we will reduce your payment to zero. We will not apply the late filing penalty balance to the next program year.

If a deadline falls on a Saturday, Sunday, or statutory holiday, you have until the next business day to send the information.

Where to send your completed form

Mail your Interim payment form to:

AgriStability Administration
PO Box 3200 Station Main
Winnipeg MB R3C 5R7

or fax your form toll-free to: 1-877-949-4885.

We suggest using registered mail or keeping your fax transmittal slip to show that you sent your form on time.

Completing your form

To participate in AgriStability, we must assign you a Participant Identification Number (PIN).

The PIN uniquely identifies your farm operation and protects the privacy of your information.

If you previously participated in AgriStability, you have a PIN. If not, we will assign one to you. Keep the number handy as you will need it for future contact and participation.

Operation Number (#)

If you have more than one farming operation:

- complete a form for each operation,
- number each operation and
- send all forms together.

If you have participated in AgriStability before, number the operations in the same order as the last time you applied.

Participant identification

Name and Participant Identification Number (PIN)

Enter your first and last name, or business name (if applicable) and PIN. You have a PIN if you are an AgriStability or AgriInvest participant.

If you are a new participant without a PIN, see 1a.

1a) New participant

If your answer is "Yes", complete Schedule 1 – Additional Information (sections a, b, and c) and Schedule 2 – Worksheet for 2017 Reference Margin.

1b) Change in information

If your answer is "Yes" to any of the questions in this section, complete the related sections on Schedule 1 – Additional Information to update your information.

Other information

2a) Production cycle

Check if you completed a production cycle on at least one of the commodities you produce.

If your answer is "No", check if you were unable to complete a production cycle on at least half of your farms total production because of disaster circumstances such as:

- flooding
- disease
- drought

You must complete a production cycle to be eligible for AgriStability. If you could not complete a production cycle because of disaster circumstances, we may waive this condition.

A production cycle includes at least one of the following:

- growing and harvesting a crop
- the process of rearing livestock
- buying and selling livestock for feeding and finishing

2b) Federal public office holder or employee of Agriculture and Agri-Food Canada

If you or anyone involved in completing this form is a current or former federal public office holder or employee of AAFC, answer "Yes" to this question.

Answer "Yes" if at least one of the shareholders, members, or partners of your farming arrangement is a current or former federal public office holder or employee of AAFC.

2c) AgriInsurance (crop or production insurance)

Check if you produced commodities that are insurable under AgriInsurance (crop or production insurance), even if you did not insure them.

If your answer is "Yes", were more than half of your insurable crop acres insured at 70% or higher?

If you insured more than half of your insurable crop acres at 70% or higher, you may be eligible for a benefit if you have a negative margin. A negative margin occurs when your allowable expenses are greater than your allowable income for the current program year.

2d) 2017 AgriStability application

Check if you have completed a 2017 AgriStability form.

If your answer is "No", complete Schedule 2 – Worksheet for 2017 Reference Margin.

We need this information to calculate your Interim payment.

The Schedule 2 worksheet does not replace your final 2017 AgriStability form. If you enrolled for the 2017 program year, send your final 2017 AgriStability form by the program deadline.

Farming operation

3a) Combined operations

AgriStability is a whole farm program. That means we may combine your farm with another farm even if that operation reports separately for income tax.

Combining ensures that AgriStability benefits are paid to farms that have decreases in income for reasons beyond their control, not because of business or tax planning decisions.

Generally, you should check "Yes" to this question if your farm is:

- legally, financially, or operationally dependent on another farm or
- engaged in significant transactions with another farm that are not at fair market value

Individuals in a partnership do not need to be combined.

If your answer is "Yes" to this question, provide the farm's PIN. If there are more than two farms, attach a sheet listing the other PINs.

We cannot process your form until we receive information from all the farms that are being combined.

3b) Partners

Partners in a partnership must estimate 100% of the partnership's income, expenses and production. We calculate the benefits for each partner based on their share of the partnership.

Enter your percentage share of the partnership.

Enter the PIN, name or corporation name and percentage share for each partner involved in the partnership.

Program year farming activity

This section helps us estimate your 2018 income and expenses.

4a) Program year payments

Enter the total AgriInsurance (crop or production insurance) payments you received or expect to receive for your production in your 2018 program year.

Enter any other program payments you received or expect to receive for the loss of allowable commodities in your 2018 program year.

- For a list of program payments, see the Program payment list on page 12.
- For programs not listed, attach a note to your form showing the program name and total expected payment amount. If you do not know the exact amount of the payment, provide an estimate.

If you receive a program payment after you receive an Interim payment, we will include this amount in income when we process your final 2018 form.

4b) Allowable expenses

This section shows if you have or expect to have a significant increase or decrease in your expenses. The expense categories listed are those that commonly vary from year to year.

If you do not expect to have a significant increase or decrease for each category, check the "No Significant Change" box. We will estimate the expense based on the information you provided in prior years.

If you expect to have a significant increase or decrease for any of the expenses listed, enter:

- the total amount of the expected expense (not just the increase or decrease) or
- "0" if you have a significant decrease which brings an expense to zero

Enter only the expenses related to your 2018 production. Do not include amounts paid in 2018 for prior year expenses.

Example
You have a December 31st year-end. You apply $45,000 worth of fertilizer in the spring of 2017 but do not pay for it until 2018. As this expense relates to your 2017 production, do not report it on your 2018 Interim form.

4c) Productive capacity decrease due to disaster circumstances

Check if you had a decrease in your productive capacity of crops or livestock because of a disaster. A decrease in productive capacity means a decrease in the total amount that you can produce on your farm.

4d) Crop production

The information you provide in this section is used to estimate your crop income and productive capacity.

Code and crop description

Use the Interim code list on page 13 to report all crops by code and description that you harvested or expect to harvest in the 2018 program year. If your crop is not listed, leave the code blank and provide a detailed crop description.

Grain production

Report each grade or variety of crop separately. For example, report #1 CWRS wheat separately from #2 CWRS wheat.

Organic production

Report your crop as "organic" only if it is Certified Organic. We may ask for your organic certification.

Acres

Report the number of acres of crops that you harvested or expect to harvest in the 2018 program year.

If you grow a multi-stage crop, see the multi-stage crop section for more information on how to report the acres.

For commodities not measured by acres, use the standard unit of measurement for that commodity.

Example
Greenhouses and nursery operations (including floriculture) report in square metres.

Maple syrup operations report in hundreds of taps producing. If you have 350 taps producing, report 3.5 (350/100).

Crop share

If you are a tenant in a crop share, or a landlord in a joint venture crop share, report your share of the acres and estimated production.

Example
You rent 300 acres in a crop share agreement. You receive 2/3 of the crop and pay 2/3 of the allowable expenses. Your landlord receives the remaining 1/3 of the crop and pays 1/3 of the allowable expenses. The rented land produced 300 tonnes of wheat.
You report your 2/3 share of both the acreage and the production:

- 200 acres
- 200 tonnes of wheat

Your landlord reports his 1/3 share of both the acreage and the production:

- 100 acres
- 100 tonnes of wheat

Unharvestable acres

If you grew a commodity and expected to harvest it in the program year, but could not for reasons beyond your control, report the commodity, acres and enter 'zero' as the production (tonnes) estimate.

Multi-stage crops

Multi-stage crops are commodities that take longer than one year to reach full production. Because multi-stage crops are grown over several years, there are different inventory codes to reflect the stage of production.

Report all the acres of your crop based on their stage of growth, even if you did not harvest the crop in your 2018 program year.

Use the Interim code list on page 13 to report the stage of production for your commodity.

Multi-stage crops include:

- high bush blueberries
- grapes
- sod
- echinacea
- ginseng
- Christmas trees

In New Brunswick and Nova Scotia, multi-stage crops also include:

- low bush blueberries
- cranberries

Highbush blueberries and grapes

Start reporting your acres in the year you plant.

Lowbush blueberries

Start reporting your acres once you have cleared the land and started nurturing the plants. When you start producing blueberries, report your acres based on their stage of growth. Continue reporting your acres in the years you burn/mow/sprout

Sod

Report your estimated sod acres (seeded, growing, and harvested) based on their expected stage of growth at the end of your fiscal year.

Example 1
You seeded 150 acres at the end of 2018 and harvested them in 2019. Report 150 acres using code 6941, Sod, acres seeded. Your estimated production is zero.

Example 2
You seeded 150 acres in 2017 but did not harvest those acres until 2019. Report 150 acres using code 6943, Sod, acres growing. Your estimated production is zero.

If you harvested and then re-seeded the same sod acres in your 2018 fiscal year, report the acres twice.

Example
If you harvested and then reseeded 150 acres, report 150 acres using code 6945, Sod, acres harvested and 150 acres using code 6941, Sod, acres seeded. Report your estimated production for the harvested acres. Report zero production for the seeded acres.

Echinacea and ginseng

Report acres in the establishment stage until the year of harvest. If you expect to harvest the acres, report them as root harvested.

Cranberries

Report acres in the establishment stage until production starts. This stage can last up to three years.

Christmas trees

There are two types of Christmas tree operations:

- tree farms
- managed natural tree stand.

Tree farms plant their seedlings in a greenhouse, garden or tree farm, and maintain them until harvested.

Report your total acres of trees based on their stage of growth at the end of your fiscal period.

To report your trees, use:

- nursery codes for the seedlings you grow in your greenhouse or garden prior to transplanting to your tree farm.

- code 6960 for the seedlings or trees you planted on your tree farm the first year (establishment stage).
- code 6961, 6962, 6963, and 6964 to report your seedlings or trees based on their stage of growth.

Report your expected production amount based on the number of trees you intend to harvest and sell.

Managed natural tree stand operations select trees from an existing forest and actively maintain them until harvest.

Report the acres of trees that you intend to actively maintain as either pre-harvested (in the ground) or harvested (removed from the ground). Base the number of acres you report on 1000 trees per acres.

Example
If you expect to have 9,500 pre-harvested trees at the end of your fiscal year, report 9.5 acres (9,500/1,000).

For pre-harvested acres, report zero for expected production.

For harvested acres, report your expected production amount based on the number of trees harvested and intended for sale.

Summerfallow, pasture and wasteland

Report your expected summerfallow, pasture or wasteland acres on the designated lines.

Unseedable acres

Report all acres that you planned to seed in the 2018 program year but could not because your land was too wet or dry to seed.

Example
At the beginning of the year you intended to grow canola on 300 acres. However, you only seeded 200 acres because of flooding. In your crop production for canola, report 200 for the number of acres and 100 as unseedable acres.

Production (tonnes expected)

Report the quantity of crop you expect to produce in tonnes in 2018. For commodities not measured by tonnes, use the standard unit of measurement. For example, report maple syrup in litres.

Snowed-under crops

If you could not harvest some or all of your crop at the end of your fiscal year because it was snowed under, report:

- the total acres for the crop using the inventory code for that crop; and
- the estimated production that you may be able to harvest next year.

Standing crops

If your farm always has a standing crop at the end of your fiscal year (for example: July 31st), do not report the standing crop.

If your farm has an unexpected standing crop because you could not harvest it before the end of your fiscal year, include the expected standing crop in production (tonnes).

Production intended for sale (tonnes)

Report the quantity of crop you intend to sell (in tonnes) in 2018. Do not include production that you intend to use on-farm for feed or seed.

If you report a multi-stage crop and the crop is not ready to harvest in the fiscal year, report zero.

Price per tonne ($)

Use the Interim code list on page 13 to find pricing for your crop. There are two categories of pricing.

For codes marked with an "X", we have developed prices to value these crops. You can only provide your own price if:

- your method of marketing the crop is very different from the general marketing practice or
- your crop is very different from the crop listed

If you provide your own price, send copies of your receipts or documents to support the price.

For codes not marked with an "X", enter your own price.

In both cases, we will decide if these prices are reasonable for your farm.

4e) Livestock Production

The information you provide in this section is used to estimate your livestock income and productive capacity.

Do not report an animal more than once on the form.

Before you complete this section, you will need to know how to calculate animal feed days.

Animal feed days

Animal feed days are based on the (number of expected animals) x (number of expected days each animal will be fed).

Example

100	expected animals fed
x 90	expected days
9,000	feed days

Animal feed days are based on the total number of feed days for the year, not the number of feed days per animal.

Livestock lease agreements

If you lease animals but do not take 100% of the revenue from the animal, report only your share of the agreement.

Example
If you lease 100 cows but take only 60% of the calf crop, report only 60 cows (60% of 100) using code 8004. Next, report 60 calves under # of calves born.

For further instructions, see the livestock categories listed below.

Code

Most livestock codes and categories are pre-printed on the form. See the Other production on page 10 for instructions to report any livestock commodities not listed.

Productive animals:

Cow/Calf (code 8004)

Do not report cows from your dairy operation in this section. See Other production on page 10 for more information.

Number (#) of cows that calved

Report the number of cows that calved or you expect to calf in the 2018 program year.

Number (#) of calves born

Report the number of calves that were born or you expect to be born in the 2018 program year. Do not include calves that died or were held over from your previous fiscal period.

Number (#) of calf feed days

Calf feed days begin after weaning and end with the earlier of:

- the sale of the animal or the estimated time of sale or
- the end of your fiscal period

Report the number of calf feed days for calves born or you expect to be born in the 2018 program year that were weaned and fed. See the instructions on this page on how to calculate animal feed days.

Enter zero if you do not have or expect to have any calf feed days.

Average wean weight

Report the average wean weight of your calves in pounds.

Hog production (codes 8751 and 8760):

Number (#) of sows that farrowed (codes 8751 and 8760)

Report the number of sows that birthed or you expect to birth in the 2018 program year.

Calculate the average number of sows that birthed or you expect to birth in the 2018 program year by dividing the births by your average birthrate per sow for the year.

Example

10,000	births
÷ 23	average birthrate per sow
435	average number sows that birthed

Number (#) of animals born (codes 8751 and 8760)

Report the total number of piglets born or you expect to be born in the 2018 program year. Do not include piglets that died. Report a birth only once in either of these two categories depending on your type of operation (either farrowing or farrow to finish).

Average wean weight (code 8751)

Report the average wean weight of the piglets for "Hogs, Farrowing".

Feeder livestock:

Feeder cattle (codes 8066 and 8068)

The feeder categories include animals born on the farm that were held over from the previous year and animals purchased in the 2018 program year.

Number (#) of animals fed (codes 8066 and 8068)

Report the number of animals you fed that had an appreciable gain in 2018 (a 90 kg (200 lbs) weight gain or a minimum of 60 days on feed).

Report the number of feeders held over from the previous year or purchased during the 2018 program year that you sold as feeders or you expect to sell as feeders.

Group the animals that you sold or expect to sell based on their sale or estimated sale weight.

Example
If you fed and sold 50 feeder cattle (under 900 lbs) in the first 7 months of the year, and fed or expect to feed another 50 feeder cattle (under 900 lbs) for the last 5 months, record 100 animals fed as feeder cattle (under 900 lbs) use code 8066.

Do not include breeding animals, culls, animals that have not been weaned or animals born in the 2018 program year.

Number (#) of animal feed days (Codes 8066 and 8068)

Report the number of animal feed days you have or expect to have during the 2018 program year. See the instructions on page 8 for how to calculate animal feed days.

For purchased cattle, animal feed days begin the later of:

- the day you bought the animal or
- the start of your fiscal period

For animals born on-farm in the previous fiscal year, animal feed days begin the later of:

- the weaning date of the animal or
- the start of your fiscal period

For both purchased cattle and animals born on-farm, animal feed days end the earlier of:

- the sale of the animal or the estimated time of sale or
- the end of your fiscal period

Do not include calves born in the 2018 program year or calves held over from the previous year that you sold or expect to sell as calves, breeding animals, or culls.

Enter zero if you do not have or expect to have any animal feed days.

Feeder hogs (codes 8762 and 8761)

Report purchased hogs in this category. Do not include breeding animals, culls, weaned animals born in the 2018 program year and births reported under the farrowing and/or farrow to finish categories.

Number (#) of animals fed (codes 8762 and 8761)

Report the number of animals you fed or you expect to feed during the 2018 program year.

Group the animals you sold or expect to sell in the 2018 program year based on the sale weight in the 2018 program year.

Example
If you fed and sold 50 feeder hogs (over 50 lbs) in the first 7 months of the year and fed or expect to feed another 50 feeder hogs (over 50 lbs) for the last 5 months, record 100 animals fed as Hogs, Feeders (fed over 50 lbs), use code 8761.

Do not include breeding animals, culls, animals that have not been weaned, animals born in the 2018 program year or animals previously reported in a farrow to finish operation.

Number (#) of animal feed days (codes 8762 and 8761)

Report the number of animal feed days you have or expect to have during the 2018 program year. For Hogs, nursery (up to 50 lbs), use code 8762 and for Hogs, feeders (over 50 lbs), use code 8761. See the instructions on page 8 for how to calculate animal feed days.

For purchased hogs, animal feed days begin the later of:

- the day you bought the animal or
- the start of your fiscal period

For animals born on-farm in the previous year, animal feed days begin the later of:

- the weaning date of the animal or
- the start of your fiscal period

For both purchased hogs and hogs born on-farm, animal feed days end the earlier of:

- the sale of the animal or the estimated time of sale or
- the end of your fiscal period

Do not include farrow to finish operations, farrowing operation, breeding animals and culls in the number of animal feed days.

Enter zero if you do not have or expect to have any animal feed days.

Custom fed livestock:

Cattle (code 8133) and hogs (code 8749)

Number (#) of animal feed days

Report the number of animal feed days you have or expect to have during the 2018 program year for custom fed animals. See the instructions on page 8 for how to calculate animal feed days.

Enter zero if you do not have or expect to have any animal feed days.

Supply managed commodities:

Poultry (codes 7650 and 7862)

Number (#) of kilograms of quota

Report the number of kilograms of quota you have or expect to have in the 2018 program year.

Number (#) of kilograms produced

Report the number of kilograms you produced or expect to produce in the 2018 program year.

Estimated price ($)

Enter your estimated price "per kg" or "per unit" for your production. We will decide whether the price is reasonable for your farm.

Egg production (codes 7663 and 7664)

Number (#) of hens producing

Report the number of hens you produced or expect to produce in the 2018 program year.

Dozens of eggs produced

Report the dozens of eggs you produced or expect to produce in the 2018 program year.

Estimated price ($)

Enter your estimated price "per unit" for your production in the space provided. We will decide whether the price is reasonable for your farm.

Other production:

Refer to the Productive capacity list on page 35 to find the codes and units required to report "other" commodities that are not specified on the Livestock Production section of the form.

If your commodity is not listed, leave the code blank.

List other estimated livestock production in as much detail as possible. For example, list "lambs born" or "wool produced" rather than just "sheep".

If you produce purebred livestock, indicate "purebred" in the description line to ensure we assign the correct value to your 2018 program year production.

For commodities not measured by number of head, report your yield based on the standard unit of measurement for the commodity. For example, report PMU production on a per contracted gram basis. Be sure to indicate the type of unit.

Use the Interim code list on page 13 to determine pricing for your commodity. There are two categories of pricing.

For codes marked with an "X", we will value these commodities using Interim prices we have developed. You can provide your own price only if:

- your method of marketing the commodity is very different than the general marketing practice or
- the commodity is very different than the commodity listed

If you provide your own price, send copies of your receipts or documents to support the price.

For codes not marked with an "X", enter your own price in the space provided.

In both cases, we will decide whether these prices are reasonable for your farm.

Schedule 1 - Additional information

Complete Schedule 1 only if:

- you answered "Yes" to section 1a) on page 1 of the 2018 Interim form.
- you answered "Yes" to any question in section 1b) on page 1 of the Interim form

A) Participant identification

Enter your first and last name, or your business name (if applicable), address, email address, daytime phone number and fax.

If you are an individual producer, provide your Social Insurance Number.

If the operation is a corporation or a co-operative, provide the Business Tax Number.

If the operation is a trust or communal organization, provide the Trust Taxation Numbers.

If you are a Status Indian, provide your Social Insurance Number or Business Number.

B) Contact person

Complete this area if you grant permission to someone else (such as your spouse, common-law partner, or accountant) to provide or ask for more information about your form. We will call your contact person if we have a question. We will send correspondence to both you and your contact person.

Enter the first and last name of your contact person, their business name (if applicable) address, daytime phone number and fax.

You must provide your contact person's information each time you send a form. This information will not be carried forward from last year. If you leave this area blank, we will contact you directly if we have a question.

C) Business structure

Enter your fiscal period in this section.

If you are a Status Indian farming on a reserve and you are not required to file a tax return, we will assume you have a December 31st fiscal year end.

Province of main farmstead

Enter the province/territory where all or the majority of the gross farming income was earned over the previous five years.

Farm Type

Select all that apply.

If you are a Status Indian farming on a reserve or a Status Indian Band Farm, provide your Band number in the space provided.

D) Change in business structure

If your business structure has changed since the last time you participated in the AgriStability program, complete this section.

Schedule 2 - Worksheet for 2017 reference margin

Complete Schedule 2 only if:

- you answered "Yes" to section 1a) on page 1 of the form
- you answered "No" to section 2d) on page 1 of the form

Use the most recent AgriStability and AgriInvest Harmonized Guide to complete this worksheet. For a copy of the guide, visit agr.gc.ca/agristability.

If you need assistance, call us toll-free at 1-866-367-8506.

2018 AgriStability Interim payment program payment

Program payment	Code
2016 Canada-Alberta bovine tuberculosis assistance initiative (allowable income)	674
2016 Canada-Saskatchewan bovine tuberculosis assistance initiative	675
2016 Canada – Nova Scotia fire blight initiative	673
2013 Canada – Nova Scotia strawberry assistance initiative	668
2012 Canada – Ontario forage and livestock transportation assistance initiative	662
Canada – British Columbia excess moisture initiative	624
Canada – British Columbia feed assistance and pasture restoration initiative	625
Canadian Food Inspection Agency (CFIA) payment for allowable commodities	663
Canadian Food Inspection Agency (CFIA) payment for supply managed commodities	664
Canadian Food Inspection Agency (CFIA) payment for other amounts	665
Crop cover protection program	473
AgriInsurance /production/crop/hail insurance	
Grains, oilseeds, and special crops	401
Edible horticulture crops	402
Non-edible horticulture crops	470
Other commodities	463
Cull breeding swine program (all provinces)	582
Insurance proceeds for allowable expense items	406
Livestock feed insurance program	412
Ontario juice grape transition program	551
Ontario special beekeepers fund	552
Orchard and vineyards transition program	583
Other AgriRecovery program (allowable income)**	627
Plum pox eradication	600
Private insurance proceeds for allowable commodities	661
Saskatchewan cattle and hog support program	593
Waterfowl/Wildlife damage compensation	
Grains, oilseeds, and special crops	418
Horticulture	419
Other commodities	425
Western livestock price insurance program (WLPIP)	667

**This code should only be used for AgriRecovery programs (allowable for AgriStability) that are not specifically listed above.

Interim code list

Shaded areas show which codes can be used by province when reporting production.

Codes with an "X" in your province: The Administration has established Interim price values for these codes. You can provide your own price only if your method of marketing the commodity was substantially different than the general marketing practice or the commodity is substantially different than the commodity listed.

Codes without an "X" in your province: For these commodities, submit your own price by attaching a written note or receipt. The Administration will assess whether the price you wish to use is reasonable for your farm.

Livestock

Bees and bee by products

Code	Description	MB	NL	NB	NS	YT
7602	Beeswax					
7614	Honey Bees					
7618	Leaf Cutter Bees					

Bison

Code	Description	MB	NL	NB	NS	YT
7906	Bison					
7932	Feeder Bison (under 700 lbs)					
7934	Feeder Bison (over 701 lbs)					
7935	Bison, Custom Fed					

Cattle

Code	Description	MB	NL	NB	NS	YT
8004	Cow/Calf	X				
8063	Cattle, Semen					
8066	Feeder Cattle (Under 900 lbs)	X				
8068	Finished Cattle (Over 901 lbs)	X				
8074	Purebred Cow/Calf					
8130	Purebred Feeder Cattle (Under 900 lbs)					
8132	Purebred Finished Cattle (Over 901 lbs)					
8133	Cattle, Custom Fed	X				
8208	Dairy Calves					
8268	Feeder Dairy Cattle (Under 900 lbs)					
8270	Finished Dairy Cattle (Over 901 lbs)					
8276	Purebred Dairy Calves					

Commercial game animals

Code	Description	MB	NL	NB	NS	YT

Productive capacity list

This list is used to identify codes and the units required for reporting the production and/or productive capacity for "other" commodities not listed in section 4e) of the Interim Application.

Code	Description	Production	Productive capacity
7602	Beeswax	# of lbs produced	Nothing to report
7614	Honey bees	# of lbs of honey produced	# of hives producing
7618	Leaf Cutter Bees	# of gallons of bees pollinating	# of gallons of bees pollinating
7906	Bison	# of animals born	# of females that have birthed
7932	Feeder Bison (under 700 lbs)	# of animal feed days	# of animals fed
7934	Feeder Bison (over 701 lbs)	# of animal feed days	# of animals fed
7935	Bison, Custom Fed	# of animal feed days	# of animal feed days
8063	Cattle, Semen	# of straws sold	# of straws sold
8074	Purebred Cow/Calf	# of calves born	Nothing to report
8130	Purebred Feeder Cattle (Under 900 lbs)	# of animal feed days	Nothing to report
8132	Purebred Finished Cattle (Over 901 lbs)	# of animal feed days	Nothing to report
8208	Dairy Calves	# of calves born	Nothing to report
8268	Feeder Dairy Cattle (Under 900 lbs)	# of animal feed days	# of animals fed
8270	Finished Dairy Cattle (Over 901 lbs)	# of animal feed days	# of animals fed
8276	Purebred Dairy Calves	# of calves born	Nothing to report
7510	Alpaca	# of animals born	# of females that have birthed
7518	Alpaca, Fibre	# of lbs produced	Nothing to report
7560	Llama	# of animals born	# of females that have birthed
7568	Llama, Fibre	# of lbs produced	Nothing to report
8425	Red Deer, Bulls Producing Velvet	# of lbs produced	# of bulls producing
8431	Red Deer, Semen	# of straws sold	# of straws sold
8435	Red Deer	# of animals born	# of females that have birthed
8506	Reindeer	# of animals born	# of females that have birthed
8856	Wild Boar, Finishers	# of animal feed days	# of animals fed
8860	Wild Boar	# of animals born	# of females that have birthed
8200	Dairy Quota, Butterfat	# of kgs produced	# of kgs of butterfat/day
8264	Dairy Quota, Milk	# of hectoliters produced	# of hectoliters of milk
8414	Deer	# of animals born	# of females that have birthed
8415	Deer, Feeders	# of animal feed days	# of animals fed
8419	Deer, Semen	# of straws sold	# of straws sold
8458	Elk	# of animals born	# of females that have birthed
8463	Elk, Custom Fed	# of animal feed days	# of animal feed days
8469	Elk, Semen	# of straws sold	# of straws sold
8472	Elk, Velvet Produced	# of lbs produced	# of bulls producing
8473	Elk, Feeders	# of animal feed days	# of animals fed
8910	Goats, Feeder	# of animal feed days	# of animals fed
8914	Goats	# of animals born	# of females that have birthed
8915	Goats, Custom Fed	# of animal feed days	# of animal feed days
8924	Purebred Goats	# of animals born	Nothing to report

Productive capacity list

Code	Description	Production	Productive capacity
8465	Horses, Feeders	# of animal feed days	# of animals fed
8561	Horse, Semen	# of straws sold	# of straws sold
8564	Horse	# of animals born	# of females that have birthed
8572	Pregnant Mare Urine Produced (PMU)	# of grams produced	# of grams contracted
8580	Purebred Horse	# of animals born	Nothing to report
7653	Custom Fed Chicken Pullets	# of animals fed	# of animals fed
7658	Chicken, Pullets	# of animals fed	# of animals fed
7702	Ducks, Broilers	# sold	# sold
7710	Ducks	# hatched	# of producing hens
7752	Geese, Broilers	# sold	# sold
7766	Geese	# hatched	# of producing hens
7793	Partridge, Broilers	# sold	# sold
7799	Partridge	# hatched	# of producing hens
7803	Pheasant, Ring Neck	# hatched	# of producing hens
7807	Pheasant, White	# hatched	# of producing hens
7811	Pheasant, Ring Neck, Broilers	# sold	# sold
7813	Pheasant, White, Broilers	# sold	# sold
7824	Squab	# hatched	# of producing hens
7866	Turkey	# hatched	# of producing hens
7888	Quail, Broilers	# sold	# sold
7894	Quail	# hatched	# of producing hens
8610	Chinchillas	# of animals born	# of females that have birthed
8639	Fox	# of animals born	# of females that have birthed
8664	Mink	# of animals born	# of females that have birthed
8689	Rabbits	# of animals born	# of females that have birthed
7731	Emu	# hatched	# of producing hens
7779	Ostrich	# hatched	# of producing hens
7829	Rheas	# hatched	# of producing hens
8925	Sheep, Feeders	# of animal feed days	# of animals fed
8964	Sheep	# of animals born	# of females that have birthed
8965	Sheep, Custom Fed	# of animal feed days	# of animal feed days
8974	Purebred Sheep	# of animals born	Nothing to report
8978	Wool	# of kgs produced	Nothing to report
8771	Hogs, Semen	# of straws sold	# of straws sold
